

Deramaxx

Deramaxx Chewable Tablets

Deramaxx Chewable Tablets are for the control of pain and inflammation following orthopedic surgery in dogs. Osteoarthritis is a painful, degenerative disease that affects a dog's joints. It is the most common cause of chronic pain in dogs. In fact, one out of five adult dogs suffers from this debilitating condition.

Dogs are at risk for Osteoarthritis if they: (1) Are over the age of five (2) Are inactive or overweight (3) Are large or giant breed dogs (4) Have suffered joint injuries (5) Are predisposed to developmental orthopedic disorders such as hip or elbow dysplasia.
