

Interceptor

Interceptor ® Flavor Tabs

The palatable once-a-month prescription tablet that prevents heartworm disease and flea populations in dogs and puppies. INTERCEPTOR Flavor Tabs are palatable and most dogs will consume the tablet willingly when offered by the owner. As an alternative, the dual-purpose tablet may be offered in food or administered as other tablet medications. Watch the dog closely following dosing to be sure the entire dose has been consumed. If it is not entirely consumed, redose once with the full recommended dose as soon as possible.
