

## Previcox

PREVICOX, (firocoxib), is a prescription-only medication available for dogs under the care of a licensed veterinarian. Developed specifically for companion animals, PREVICOX is available in a once-a-day dose that provides therapeutic pain relief for 24 hours after treatment. Dogs treated with PREVICOX in dose confirmation studies showed improvement in lameness within three hours compared to untreated controls, and returned to almost normal function after seven hours.
