PROGRAM® (Lufenuron) FLAVOR TABS® FOR DOGS & CATS

Treatment with PROGRAM Flavor Tabs may begin at any time of year. The flavored once-a-month tablet that prevents and controls flea populations in dogs. In geographic areas where flea infestations are seasonal, the treatment schedule should begin several weeks prior to the expected onset of infestations. Treatments should continue until the end of "flea season." If there is risk of exposure to fleas year-round, then treatment should continue the entire year without interruption. Ask your veterinarian for details concerning your geographic area and the most effective treatment schedule for your pet.
